Scope

The Terms shall constitute an agreement between the Investor and the Company and shall govern the participation in the Token Offer, the acquisition, holding or use of Tokens, as updated from time to time, to the extent not covered by any of the other Documents.

The Company is the issuer of the Tokens which shall be utilised on the Platform. Information on the Token and the Platform may be found in the Documents including the Website as updated by the Company or its Related Entities from time to time.

The Investor and the Company shall each hereinafter be referred to as the “Party” and collectively as the “Parties”.

Acceptance of Terms

By accepting the Token Offer Agreement, these Terms and other documents made available via the Website, participating in the Token Offer and/or holding and/or using Tokens and/or the Platform at any moment in time, the Investor confirms that he has read, understood, agreed and accepts to be bound by these Terms, which shall immediately be effective and binding on and between the Parties. Should the Investor not agree to the Terms, the Investor shall not be authorised to acquire and/or use the Tokens.

The Investor understands and agrees that the Terms can be changed for any other reason by the Company (as noted elsewhere in these Terms) and it is up to the Investor to ensure that he is aware of the latest terms as available on the Website or via any other means.

The Investor hereby represents and warrants that, to the extent permitted by law, he is authorised to participate in the Token Offer, to acquire, to hold and/or use the Tokens in his country, that he is of legal age to be bound by these Terms and that he has all necessary power and authority to enter into the Terms.

The Investor hereby further represents and warrants that he understands the usage and intricacies of cryptographic tokens, smart contract functionality, token storage mechanisms (including wallets) and has sufficient understanding of technical, financial and business matters, and he appreciates and assumes the risks and implications of holding and using similar tokens.

Risk Factors

Participation in the Token Offer and/or the acquisition and/or use of Tokens as well as the use of the Platform at any moment in time, carries with it a number of risks. The Investor should carefully weigh all the risks and possible costs, including the non-exhaustive list of risks described in the Terms.

The following is a non-exhaustive disclosure of principal risk factors which are considered to be material by the Company in connection with the Token Offer, and the acquisition, holding and/or use of Tokens. Investors should consider these risk factors alongside all other information provided in the Terms and are advised to consult with their own professional advisers (including their financial, accounting, legal, tax, technical or other advisers and experts) before deciding to acquire the Tokens. In addition, Investors should be aware that the risks described herein may combine and thus intensify one another.

The Company believes that the following risk factors may even affect its own its Related Entities' business, as well as the external valuation of Tokens (which external valuation is beyond the scope and purpose of the reason behind the Project and the Company's business). Most of these risk factors are contingencies which may or may not occur and the Company is not in a position to predict the likelihood of such contingency occurring.

The Investor hereby understands and agrees that Tokens are merely pre-payment tokens linked to the use of the Platform and the Project as explained in the Documents. As noted elsewhere in the Terms, Tokens are not being structured or sold as a digital currency, commodity, security, financial instrument or any other form of investment in any jurisdiction. Accordingly, none of the information presented in the Documents is intended to form the basis for any specific recommendation.

By participating in the Token Offer, acquiring, holding and/or using the Token, the Investor expressly acknowledges and assumes the following risks:

General suitability of token acquisition

The acquisition of Tokens from the Company is only suitable for financially-sophisticated persons who are capable of evaluating the merits and risks of such an acquisition, or other persons who have been professionally advised with regard to token acquisition and who have sufficient financial resources to be able to bear any losses that may arise therefrom (which may be equal to the whole amount spent in connection with the token acquisition). Such an acquisition should not be seen as an investment or a financial asset.

Risk of losing access to Tokens due to loss of private key/s, custodial error or Investor error

A Wallet is necessary to acquire, hold and dispose of the Tokens. The Investor hereby understands that he is responsible for setting up the Wallet with a third-party provider to hold Tokens and he is responsible for implementing reasonable measures for securing the Wallet. Accordingly, loss of requisite private key/s associated with the Wallet holding the Tokens will result in loss of such Tokens and any other cryptocurrencies and/or tokens held within. Moreover, any third party that gains access to such private key/s, including by gaining access to login credentials of the Wallet that the Investor uses, may be able to misappropriate the Investor's Tokens. Any errors or malfunctions caused by or otherwise related to the Wallet that the Investor chooses to receive and hold the Token including the Investor's own failure to properly maintain or use such Wallet or caused as a result of the choice of third-party provider for the Wallet, may also result in the loss of the Tokens. Additionally, the Investor's failure to follow precisely the procedures set forth in the Terms for acquiring and receiving the Token including but not limited to, the provision of the wrong Wallet address for receiving the Token may also result in the loss of his Token.

Risk of mining attacks

As with other decentralized cryptographic tokens based on the Cardano protocol, Tokens are susceptible to attacks by miners in the course of validating Token transactions on the blockchain, including, but not limited, to double-spend attacks, majority mining power attacks, and selfish-mining attacks. Any successful attacks present a risk to the Platform and/or Tokens, including but not limited to, accurate execution and recording of transactions involving Tokens.

Risk of hacking and security weakness

Hackers or other groups or organisations may attempt to interfere with Tokens in a number of ways, including, but not limited to denial-of-service attacks, Sybil attacks, spoofing, smurfing, malware attacks, or consensus-based attacks, and any such similar events which could have an impact on the Tokens, and the Platform.

Risk of security weakness in the smart contract, Website and Token source code or any associated software and/or infrastructure

There is a risk that the smart contract, Website, the Platform and the Tokens may unintentionally include weaknesses or bugs in the source code interfering with the use of or causing the loss of Tokens. The source code of the Website is open and could be updated, amended, altered or modified from time to time. The Company is unable to foresee or guarantee the precise result of an update, amendment, alteration or modification. As a result, any update, amendment, alteration or modification could lead to an unexpected or unintended outcome that adversely affects the Tokens and/or the Website. As a result, Tokens may be lost.

Risk of no listing or low/no liquidity

Tokens are intended to be used solely on the Platform and the Company will not (except as otherwise indicated in the Documents) support or otherwise facilitate any secondary trading on an exchange or the secondary market or the external valuation of Tokens, which are all beyond the scope and purpose of the Platform. This restricts the contemplated intended use of Tokens only to the Platform and could therefore create illiquidity risk with respect to the Token that the Investor owns. In any case, and except as otherwise indicated in the Documents, it is not the Company's aim to enable the exchange of Tokens for other cryptographic tokens or for fiat currency and it shall therefore not commit to any endeavours to list Tokens on such exchanges or any secondary markets.

Risks of an eventual unfavourable fluctuation of Token value

The Platform is intended to be financially self-sufficient and the Company commits to having no specific interest in the market value of Tokens. Nevertheless, if the value of ETH, BTC and/or Tokens fluctuates, the Company may not be able to fund development to the extent necessary, or may not be able to develop or maintain the Platform in the manner that it intended. In addition to the usual market forces, there are several potential events which could exacerbate the risk of unfavourable fluctuation in the value of ETH, BTC or the Tokens including a DAO-like attack on the Cardano network, or significant security incidents or market irregularities at one or more of the major cryptocurrency exchanges.

Risk of malfunction in the Cardano network or any other blockchain and of competing platforms

It is possible that Tokens interact with malfunctions in an unfavourable way, including but not limited to one that results in the loss of Tokens or prevents their use on the Platform. It is possible that alternative platforms could be established that utilise the same open source code and protocol underlying the Platform and attempt to facilitate services that are materially similar to the Platform. The Platform may

compete with these alternatives, which could negatively impact the Platform, including the utility of Tokens for use of the Platform.

Risk of uninsured losses

Unlike bank accounts or accounts at some other financial institution, Tokens are uninsured unless the Investor specifically obtains private insurance to insure them. Thus, in the event of loss of Tokens or loss of Tokens' value, there is no public insurer, such as the Investor Compensation Scheme or private insurance arranged by the Company to offer recourse to the Investor .

Risk associated with uncertain regulations and enforcement actions

The regulatory status of tokens in general, the Token Offer and distributed ledger technology is unclear or unsettled in many jurisdictions outside of Malta. It is difficult to predict how or whether regulatory authorities may apply existing regulation with respect to such technology and its applications, including the Platform and the Token. It is likewise difficult to predict how or whether regulatory agencies may implement regulatory actions or changes to law and regulation affecting distributed ledger technology and its applications, including the Platform and the Tokens. Regulatory actions or changes to law and regulation could negatively impact the Token and the Platform in various ways, including, but not limited to, a determination that the acquisition, holding and use or disposal and transfer of the Token constitutes a regulated activity that requires registration or licensing of those instruments or of some or all of the parties involved in the acquisition, contribution, sale and delivery thereof. The Company and/or its Related Entities may cease operations or interrupt the Token Offer in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable or no longer viable to obtain the necessary regulatory approval/s to operate in such jurisdiction or to provide the Platform.

Risk arising from taxation

The tax characterization of the Token is uncertain. The Investor must seek his own tax advice in connection with purchasing the Token in his jurisdiction, which may result in adverse tax consequences to him, including withholding taxes, income taxes and tax reporting requirements.

Risk of insufficient interest in Token and the Platform

It is possible that the Token and the Platform will no longer be used by a large number of individuals, companies and other entities or that there will be limited interest in the use of Token and the Platform. Such a lack of use or interest could negatively impact the development of the Platform and therefore the potential utility of Token.

Internet transmission risks

There are risks associated with using the Token including, but not limited to, the failure of hardware, software, and Internet connections, or other technologies on which the Platform or the use of the Token relies. Such failures may result in disruptions in communication, errors, distortions or delays when using the Token and the Platform or the Website.

Risk of dissolution of the Company

It is possible that due to a number of reasons, including but not limited to, a decrease in the Token's utility, the failure of commercial relationships, or intellectual property ownership challenges, unfavourable market conditions and added compliance and regulatory obligations, the use of the Platform may no longer be viable or the Company and/or its Related Entities may need to cease trading and be dissolved and liquidated.

Risk arising from lack of governance rights

Since the Tokens do not represent or confer any ownership right or stake, share or security or equivalent rights, intellectual property rights or any other form of participation relating to the Company or its Related Entities, all decisions involving the Company or its Related Entities will be made by Company or the respective Related Entity at its sole discretion, including, but not limited to, decisions to transfer more Tokens for use, to sell or liquidate the Company. These decisions could adversely affect the utility of the Tokens that the Investor holds.

Regulatory risks and market risks

The Company and the Platform are subject to a variety of domestic and/or EU and international laws, regulation and directives, including those with respect to privacy and data protection, consumer protection, data security, and others. These laws, regulations and directives, and the interpretation or application of these laws, regulations and directives, could change from time to time. In addition, new laws, regulations or directives affecting the Company, the Platform and the Token could be enacted, which could impact the utility of the Token and its use on the Platform. Additionally, the Investors are subject to industry-specific laws and regulations or licensing requirements. If any of the Parties fails to comply with any of these licensing requirements or other applicable laws or regulations, or if such laws and regulations or licensing requirements become more stringent or are otherwise amended, this could adversely impact the Token and the Platform, including the Token's utility on the Platform. The Investor hereby accepts the risk that in some countries the Token might be considered, now or in the future, a security token. In this case the Company gives no representations, warranties or guarantees that the utility tokens are not considered to be security tokens in all countries. The Investor hereby accepts to be solely responsible for the legal, financial and any other risks connected to Token as a security in his country and to be responsible to check whether the holding, use and the disposal of the Token is legal in his country.

Also, changes in laws, regulations and directives governing the Company's operations may adversely affect the Company's and/or its Related Entities' business and consequently the Platform. Any change in the Company's tax status, or in taxation legislation in Malta or elsewhere, could affect the value of its financial holdings, its business and the Company's and/or its Related Entities' ability to achieve their business objective and continual commitment to the development of the Platform.

Other inherent risks

The Investor understands and accepts the inherent risks associated with the Tokens, to the extent not covered elsewhere in the Terms, including, but not limited to, risks associated with (a) money laundering; (b) fraud; (c) exploitation for illegal purposes; and (d) any other unanticipated risks.

Unanticipated risks

Cryptographic tokens such as the Tokens as well as blockchain are a new and untested technology. In addition to the risks indicated in the Documents there are other risks associated with the Investors' acquisition, holding and use of Tokens, including some that the Company cannot or may not anticipate. Such risks may further materialise as unanticipated variations or combinations of the risks discussed in the Documents.

The Investor hereby represents and warrants that he will take sole responsibility for any restrictions and risks associated with the holding or use of Token. If any of the risks, mentioned in the Terms are unacceptable or the Investor is not in the position to understand, the Investor should not acquire, hold or use Token.

Purpose and Use of Token

The Token is intended solely to be used on the Platform. The Investor can utilise the Token solely on the Platform.

As already stated in the Terms, the intention is that the Tokens are not to be transferred to third parties. However should the Investor transfer Tokens to other parties in any manner and under any title, the Investor shall be responsible to ensure that such transfer is in compliance with the applicable rules and regulation, and the Company shall not be held liable for any loss or damages that may occur.

The Investor understands and accepts that the acquisition of Tokens is final and non-refundable and is limited to its use on the Platform. The Investor acknowledges that he has no right to request a refund for any reason, except as required by the Act.

Use of Platform

Membership, benefits and the use of the Platform are regulated by a separate set of documents that are available on the Website.

Privacy and Confidentiality

In line with its Privacy Policy, the Company values Investors' privacy by not requesting any information that is unnecessary for the acquisition, the holding and/or use of Tokens and/or for the use of the Platform or to abide with obligations under applicable law. The Company commits itself to do its utmost to ensure that its directors, officers, members, employees, agents, attorneys, representatives, affiliates and associates shall not disclose to any person, any non-public proprietary, documents or confidential information which may have been obtained as a result of the relationship between the Parties under the Terms except to the extent necessary further to any law, regulations, rules or agreements.

Nevertheless, the Company shall be entitled, at any time, to request from the Investor information and/or documentation that the Company, in its sole discretion, deems fit and necessary in order to comply with any applicable law or regulation in connection with the acquisition, holding and use of the Tokens and the use of the Platform. The Investor agrees to provide the Company with such information promptly upon request, and he acknowledges that the Company may not allocate the Tokens, and/or provide access to the Platform until the Investor provides such requested information and the Company has determined that it is permissible under applicable law or regulation. The Company reserves the right to require more due diligence documentation in compliance with any new or amended regulation which may come into force in the future.

Furthermore, the duty of confidentiality does not extend to communications in furtherance of an illegal purpose nor to documents or facts showing the commissions of a crime or fraud. Moreover, the Company is subject to the duty (without the need to inform the Investor) to notify the authorities if the Company suspects that any property or money represents proceeds of corruption, drug trafficking or other crime. Moreover, the Investor acknowledges that the Company is not bound by confidentiality obligations when the disclosure is necessary in the Company's opinion to protect its own interests.

Anti-Money Laundering

The Company reserves the right to question the Investor and to request documentation necessary for Know Your Client purposes as well as proving the source of funds utilised to acquire the Tokens. The Company also reserves the right, at its sole discretion, to terminate a Investor's use of Tokens on the Platform and any other requested related or unrelated services or any portion thereof at any time, without notice, in particular due to legal grounds originating in Anti-Money Laundering and Know Your Client regulation and procedures.

Taxation of Tokens

Further to the risks in relation to taxation as outlined in the Terms, the Investor bears the sole responsibility to determine and comply with any actual or potential tax liability, if any, resulting from the acquisition of, the holding, use or disposal of the Tokens. The Company is not in any way and under no condition bound to compensate for the Investor's tax obligations or give any advice related to tax issues, including but not limited to what kind of filing or reporting needs to be done with the competent tax authority, which taxes and to which extent the Investor is obliged to pay, which tax exemptions the Investor is eligible to, or any other similar verifications and/or obligations.

Limitation of Liability and Indemnity

The Investor hereby understands and agrees that entering into the Terms, acquiring, holding, receiving and using the Tokens for any other reasons except for use on the Platform may carry serious risks (as listed in the Terms) and losses and these risks and losses are irretrievably and fully accepted by the Investor.

The Company shall not be liable for any of the following losses, including but not limited to increased or additional costs, loss of profits, loss of revenue or income, trading losses, loss of opportunity, loss of bargain, loss of time, loss of data or consequential, incidental, special, indirect losses as may be incurred or suffered by the Investor for any reason including but not limited to as a consequence of the the non-exhaustive list of risks described in the Terms (even if such damages or losses are foreseeable or even if the Company has been advised of the possibility of such damages or losses).

The Investor further acknowledges and agrees that in no event shall the Company be liable for any damages, losses, diminution in value, charges, liabilities, claims (including claims of negligence, tort or quasi-tort or other breach), demands, actions, suits, proceedings, payments, judgments, settlements, awards, assessments, deficiencies, interest, penalties and costs and expenses (including reasonable attorneys' and consultants' fees and expenses) imposed on, sustained, incurred or suffered by, or asserted against the Company, directly or indirectly relating to or arising out of the Investor's participation in the Token Offer, or any acquisition, holding or use of Tokens at any moment in time, or use of the Platform, including but not limited to any breach by the Investor of these Terms or violation of any law, rule, or rights of a third party. The Investor agrees to indemnify the Company for any legal fees or other costs that are incurred by the Company or any other indemnified parties as a result of the Investor actions.

Furthermore, the Company shall not be responsible for any losses or damages arising in connection with:

- (a) force majeure events, including acts of God, earthquakes, storms, or other nature events, blockages, embargoes, riots, acts or orders of government, acts of terrorism or war;

- (b) any labour disputes or other industrial disturbances, electrical, telecommunications, hardware, software or smart contract bugs or weaknesses, technological changes, changes in interest rates or other financial or monetary conditions;
- (c) reliance on any information contained in the Documents, any error, omission or inaccuracy in any such information or any action resulting from such information.

For the purpose of this limitation of liability clause the “*Company*” shall be deemed to include any directors, officers, members, employees, agents, attorneys, representatives, affiliates and associates.

Termination

The Company or its Related Entities may terminate or suspend the Investor’s access to the Platform without prior notice or liability for any reason whatsoever, including but not limited to, cases where the Investor breaches the Terms. Nothing in these Terms or in any other communication or action by the Company or its directors, officers, members, employees, agents, attorneys, representatives, affiliates and associates should be construed as a waiver of any legal remedies available for any event causing termination.

All provisions of the Terms which by their nature should survive termination, shall survive termination, including but not limited to, limitations of obligations or liability and indemnity.

Prohibited Investors & other limitations

Tokens are not available to (i) any Prohibited Investors, as defined in the Terms, who are prohibited from acquiring, holding and using the Tokens or any cryptocurrencies and/or tokens generally or (ii) to Investors in countries where any special or particular prior or subsequent approval, notification, registration or licence is needed without first obtaining such approval, notification, registration or licence and consequently would be excluded from being a party to the Terms, whether directly or indirectly.

These Terms shall only apply, and the Token shall only be useable, in such countries where the use of the Token as described in the Documents is not prohibited by law or regulation.

Any potential Investor considering participating in acquiring, holding or using the Token and the Token Platform is required to obtain information on whether he is a Prohibited Investor and, if applicable, to inform himself about, and to observe, any restrictions imposed by any jurisdiction other than Malta.

Assignability and Transferability

The Company may at its own discretion, assign, transfer, license, subcontract or otherwise transfer or alienate in any other manner all or any part of its rights, benefits or obligations with regard to the Token and the Platform under the Terms to any person without restriction.

Changes to the Terms

The Company may, in its sole discretion and for any reason, revise or make changes to the Terms from time to time and without prior notice by posting the revised version of the Terms on the Website and, if a revision to the Terms is material, the Company will make a notice of such on the Website or otherwise notify the Investor of the new Terms. The revised Terms will take effect immediately upon publication by

the Company and revised terms will not apply retroactively. If the Investor does not agree to the modified terms, he should discontinue the holding and use of the Token and the Platform.

Severability

If any term, clause or provision of the Terms is held to be unlawful, void or unenforceable, then that term, clause or provision will be severable from the Terms and will not affect the validity or enforceability of any remaining part of that term, clause or provision, or any other term, clause or provision of the Terms.

Entire Agreement

The Terms (and Documents if applicable) constitute the entire agreement between the parties and supersede and extinguish all previous drafts, agreements, arrangements and understandings between them, whether written or oral, relating to this subject matter.

Governing Law and Dispute Resolution

By accepting the Terms, the Investor hereby agrees that the legal relationship between the Company and the Investor and the questions concerning the construction, validity, enforcement and interpretation of the Terms shall be governed by and construed in accordance with the laws of Malta, excluding its conflicts of laws provisions.

Any dispute, controversy or claim arising out of or relating to or concerning these Terms, or the breach, or invalidity thereof, shall be settled by arbitration in accordance with the provisions of Malta Arbitration Act, Chapter 387 of the Laws of Malta and shall be regulated by the Arbitration Rules, in force from time to time, promulgated under the authority of the said Act. The Investor waives any right it may have to object to any action being brought in the forum, to claim that the action has been brought in an inappropriate forum, or to claim that the forum does not have jurisdiction.
